

**Strategic Planning for
Workforce Board Members in the Orange County Region**
Wednesday, February 27, 2019
9:00am – 2:00pm

What are key issues emerging out of the full employment economy and the rapidly evolving nature of work?

Developing a Process that Produces Relevant Education & Training That Meets Rapidly Evolving Job Requirements	Understanding the Larger Context of our Work (Factoring in the larger issues playing out in our community)	Supporting Entrepreneurship as a Viable Career Path	Finding the Best Way to Address the Generational, Economic & Cultural Divides	Addressing the Disconnect between the Regional Realities & Policy Makers
Content of training programs for the appropriate audience	Connection between Social Responsibility & Employability	Creating services that support individuals wanting or needing viable "side hustles"	Lack of workplace skills to compliment specific skill training	Need regional WFD initiatives that reflect our realities on the ground (not necessarily policy makers)
Need for Life Long Learning opportunities	Affordability (housing, cost of living, etc. vs. wages)	Gig workers training to help grow their businesses	Generational worker mindset	
Training for Jobs that Won't Exist (10 years 50% of jobs will be gone)	Health care	Need for more robust Entrepreneurship Training	Generational Divides (e.g. soft skills)	
Lower skill jobs in the economy	Housing	Services aimed at the underemployed		
Preparing youth for work	Homelessness
